- 3:30-4:30 pm Education
- 4:30-6:00 pm Happy Hour

# EDUCATION

**THURSDAY, MAY 2**

**8:30-9:30 AM**

## **The Importance of ACI Certification**

*Chontae Meeks,  
Senior Coordinator  
Certifications, AAMI*

This presentation will provide detailed insight on the benefits of acquiring, qualifications, and expectations on maintaining certification. This certification program recognizes healthcare technology management professionals whose practices reflect a high degree of knowledge about medical devices and clinical practices as well as skills in implementing electro-mechanical talents in the repair and maintenance of devices used in the delivery of healthcare. By achieving ACI certification this indicates that the certification candidates have demonstrated a broad knowledge skill set in their specific certification area.

## **Introduction to Contrast Injectors**

*Stephen Maull, Owner,  
Maull Biomedical  
Training, LLC*

This course will teach the purpose of contrast injectors, the principles of why the different parameters are selected when performing an injection and the general components of contrast injectors as well as general operations and items of interest when performing a PM.

## **Are You Maximizing Potential with Your CMMS? 6 Ways to Evaluate Your ROI**

*Joe Stockman, Director of  
Product Experience, FSI*  
Healthcare technology professionals are relying on their CMMS software

more than ever before for operational and regulatory compliance, managing a complete asset inventory, and maintaining medical equipment. All of these functions require a reliable, streamlined product that alleviates challenges and improves efficiency. Evaluating whether you're getting the best ROI from your CMMS requires you to consider whether your system provides six key functionalities. Attendees of this session will discover what these capabilities are, the ways in which they deliver ROI, and how they can evaluate their current CMMS solution to determine whether they are getting the best possible ROI.

**10:00-11:00 AM**

## **Get your Shop "Ship Shape" with 5S**

*Mark Cooksey, DME  
Quality Engineer, Norton  
Healthcare*

Studies suggest that employees waste up to 10% of their working hours dealing with the consequences of disorganization. This includes time spent searching for misplaced tools, inventory, or documentation, as well as addressing errors or inefficiencies resulting from a lack of organization. What if you could

harness your staff's creativity and increase ownership and accountability to create a world-class shop? Join us in exploring how to harness your staff's creativity, instill ownership, and cultivate accountability to elevate your shop to excellence. See how 5S, a methodology that tackles the "7 wastes" encompassing overproduction, waiting, unnecessary transportation, over-processing, excess inventory, unnecessary motion, and defects, can make a significant impact.

## **HTM Insight: Longitudinal Analysis of Maintenance & Repair Contracts**

*Brandon Anaya, Vice  
President, Enterprise  
Sales, PartsSource*

This session presents useful data from

a new study that quantifies factors impacting cost, quality and productivity. This analysis includes U.S. health systems data, an observational survey from more than 100 hospitals, time and motion studies, and a data warehouse analysis (100K service contracts and 500K service events and over 35M data points). This presentation will include a discussion regarding implications on portfolio complexity, time consumption, cost variability, vendor monitoring, and risk management. Participants will learn how their organization compares against these benchmarks and identify opportunities to improve financial and operational performance.

# EDUCATION CONT.

## Comparing Phaco Systems

*John Weymouth, CEO/Owner, Medisurg*  
Participants will learn the differences and similarities of different

phaco systems.

**2:00-3:00 PM**

## All in the Family: Building Teams by Bridging Generational and Demographic Gaps

*Mark Cooksey, DME Quality Engineer, Norton Healthcare*

Never have HTM staffs been comprised of such diverse generational, experiential, and demographic backgrounds. Join us as we explore the nuances of effective communication within diverse teams. Recognizing that we spend more time with our 'work families' than our home families, understanding and navigating these differences, including preferred communication styles, is essential for fostering collaboration, enhancing teamwork, and ultimately optimizing HTM outcomes. Whether you're a seasoned professional or a newcomer to the field, this session offers valuable insights, practical tools, and strategies to bridge these gaps effectively. Let's navigate this dynamic 'family' landscape together, recognizing and embracing the preferred communication styles of each generation, and creating a workplace where every unique perspective is valued and contributes to the collective success of HTM.

## Becoming an Expert in Service

*Hobie Sears, Director of Training, Field Service, NA, Probo Medical*  
A presentation of several topics that will

provide insight into becoming an expert in service. This talk geared toward those on the front lines of the HTMA industry. The presentation will cover both technical and non-technical topics that will guide your path toward being an expert in service.

## Give Me an Hour, And I Will Get Your Day Back

*Shawn Molloy, System Director, Trimedx*

Join me as we share time and work management systems and hacks. Whether your goal is to increase your work volume for that promotion or balance your work life with your personal life this course is full of ideas, shortcuts, and strategies to get you there.

**3:30-4:30 PM**

## Challenges of a One-man Biomed Shop at a Critical Access Facility

*Earl Morris, BMET, Harrison County Hospital*

Learn what it takes to run a one-man biomed department at a critical access facility. This presenter will provide key ingredients that allow him to successfully manage HR, time management, service contracts, procurement, C-Level communication, and more.

## Making Sense of Cybersecurity for HTM

*Ryan Gonzalez, Director, HTM Cybersecurity, Sodexo*

The objective of this presentation is to give HTM professionals

actionable risk reduction actions for cybersecurity. We often find that this space is full of governance models, monitoring software and awareness, but does not give onsite technicians and managers guidance on where to start or specific actions to take. In today's cyber landscape, the bare minimum cybersecurity practices are no longer good enough.

## AIAT & Service Access for Modern Diagnostic Imaging Systems

*Todd Boyland, CEO, RSTI*

This presentation is designed to provide today's medical imaging service engineers with an

overview of service access used on modern imaging systems. We will discuss what service access requirements must be met by OEMs, as well as the responsibilities of the imaging engineer during repairs. We will also discuss how each OEM handles service keys and service access, as well as examples from various OEMs.
